SYNER - Ed. 1 - EN

www.scsconcept.com

How SYNER can help you?

- Collecting and analyzing data from production and quality
- Getting best recommendations for optimization
- Using Artificial intelligence (AI) to predict errors and improve quality
- Providing customized reports automatically
- Using modern and secure technology
- No dependency on manufactures and processes

➤ Easiest way to visualize & monitor your whole production!

- One platform connects people and data
- Identify anomalies & address them before they impact you

- Have secured and high-performance IT technology with SYNER
- Use only one master data for all departments
- Collect and analyze data from production & quality in real-time
- Improve product quality
- Reduce global costs
- Using artificial intelligence (AI) to predict issues
- Accessibility on browsers for all types of devices
- Find your own Hot-Spots
- Alarm and trend signals
- Available in the cloud
- No hidden costs:
 - Full service package (includes maintenance and support)
 - Included modules in packages

➤ Access your data anywhere!

SYNER

Manage your KPI's with SYNER!

*“You can now manage your **Key Performance Indicators (KPIs)** to evaluate the **performance** of the production process”*

➤ Keep an eye on quality and let SYNER do the rest!

SYNER

One Platform

- Get transparency & uncover potential improvements
- Correlation of all data
- Improve data exchange between departments

Quality

- Easy process & tool check
- AUDIT relevant documents on one platform
- Cover norms and standards

Production

- 100% data documentation
- Fullfill product liability requirements
- Trend analysis & notifications

Cross data from production & quality

See your product lifetime
